DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-17 are allowed.
3. The following is an examiner's statement of reasons for allowance: Prior art of record do not teach or suggest the claimed printer having a plurality of developer modules installed surrounding an image roller, each of the developer modules comprising: an electrode array printhead installed neighbor to a side surface of the image roller for emitting an electron array of a predetermined level onto the side surface and forming an electrostatic image on a toner cartridge installed inside the housing for containing toner; and a developer roller rotatably installed neighbor to the toner cartridge, the toner contained in the toner cartridge, and the electrostatic image capable of attracting toner attracted by the developer roller when the developer roller rolls to a position where the developer roller is neighbor to the electrostatic image.

The printhead array is to substitute for the charged roller and laser beam unit of the prior art color printer reduces bulk and cost to design. In addition, in contrast to the operations of charge disposition and emitting laser beams to form an electrostatic image performed by the prior art, the electrode array printhead can execute the operation of charge disposition with better print quality..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
